Soft Skills

- Collaborative Communication
- Analytical Problem-solving
- Efficient Time Management
- Detail-oriented Mindset

Objective

Energetic 4th-year Software Engineering student with a strong technical background in Backend development. A highly communicative aspiring Business Analyst, dedicated to bridging the gap between business requirements and technical implementation. Goal: Achieve IELTS 7.0 to facilitate communication in international projects.

Certifications

09/2025 English Certificate - Level B1 (CEFR Standard)

09/2024 Communication and Teamwork Skills

11/2024 Machine Learning with Python

Education

Software Technology

2022 - 2026

Ho Chi Minh City University of Technology

GPA: 2.9/4

Projects

Movie Ticket Booking System **09/2025 - 12/2025**

Backend (Team size: 3)

- Designed MongoDB schema to manage movies, showtimes, users, and booking data.
- Analyzed requirements and built RESTful APIs for movie search, seat selection, and JWT auth.
- Developed Admin dashboard to manage cinema content and track revenue reports.
- Created responsive UI with React and Tailwind, featuring smart filters and news blogs.

Technologies: ReactJS, Tailwind CSS, .NET Core, MongoDB, Postman.
